Search & Browse

1. Main Page

- Search & Browse 가능
- News and Update 및 Trending Topics 정보 확인 가능

The screenshot displays the Elsevier main page interface. At the top, there is a search bar with the text "Search for conditions, procedures, drugs, and more". Below the search bar is a dropdown menu set to "All Types" and a search input field. To the right of the search bar are links for "Saved Searches" and "Search History". Below the search bar is a "Browse" section with a horizontal menu containing "Books", "Journals", "Drug Monographs", "Guidelines", "Patient Education", "Clinical Overviews/First Consult", and a "More" icon (three dots).

Below the search and browse section, there are two main navigation tabs: "News and Updates" and "Trending Topics".

The "News and Updates" section is highlighted with a red box and contains the following content:

- Content Updates**
 - [New Books and Clinical Overviews in January 2019](#)
Here's a look at the content changes for January 2019.
 - [New Journal and Books in December 2018](#)
Here's a look at the content changes for December 2018.
 - [New Books and Journals in November 2018](#)
Here's a look at the content changes for November 2018.
- Other Updates**
 - [Challenges and controversies in testosterone therapy](#)
Our Medical Editor discusses the new guidelines and evidence-based recommendations which assist clinicians in determining the suitability of hormone therapy for their patients.
 - [Opioid Research Center](#)
Elsevier's content includes online clinical solutions for physicians, nurses and students in the health professions; scientific and medical journals; textbooks; and educational products.

The "Trending Topics" section is also highlighted with a red box and contains the following content:

- How to use ClinicalKey**
 - [A Physician Reference](#)
This recording provides a comprehensive walkthrough of ClinicalKey.
 - [Training Calendar](#)

Polymer-free versus durable polymer drug-eluting stents in patients with coronary artery disease: A meta-analysis

James J. Wu, Joshua A.H. Way, Leonard Kritharides and David Brieger
 Annals of Medicine and Surgery, 2019-02-01, Volume 38, Pages 13-21, Copyright © 2018

Abstract

Background

Polymer-free drug-eluting stents (PF-DES) were introduced with the aim of reducing the risk of stent thrombosis associated with durable polymer drug-eluting stents (DP-DES). The comparison of safety and efficacy profiles between these two stent platforms remains unclear.

Midazolam

Versed

Drug Information Provided By Gold Standard

Description

Midazolam is a very short-acting benzodiazepine. It is used for conscious sedation, anxiolysis, and amnesia during minor surgical or diagnostic procedures, as an anesthesia induction agent, or as an adjunct to regional anesthesia. Midazolam has a slower induction time and more prolonged recovery time than does thiopental. The manufacturers label contains a black-box warning that describes the risk of respiratory arrest, the need for adequate personnel and equipment when administering midazolam, and the appropriate dose titration (see Contraindications). Midazolam was originally thought to be preferable to other benzodiazepines for conscious sedation because of its potency and its short duration of action, however, comparisons with diazepam, an agent with a much longer half-life, have not revealed a consistent advantage of midazolam in the surgical setting.²⁴¹⁴⁵ Parenteral midazolam is also used therapeutically in the management of agitation in mechanically ventilated patients in intensive care units, and to treat refractory status epilepticus. Oral midazolam is useful in reducing

24시간 소변 채취는 어떻게 하나요?

- 아침에 일어나자마자, 변기에 소변을 보시고 물을 내리십시오. 시간을 기록하십시오. 이는 소변을 채취한 날의 시작 시간이 되며 끝나는 시간은 다음 날 아침이 됩니다.
- 이때부터, 모든 소변은 제공된 플라스틱 용기에 수집하십시오.
- 소변을 처음 수집하고 난 24시간 후에는 더 이상 수집하지 마십시오.
- 만약 제공된 플라스틱 용기에 이미 액체가 담겨 있어도 괜찮습니다. 용기 안에 있는 액체를 버리거나 세척하지 마십시오. 일부 검사에 이 액체가 첨가되어야 합니다.
- 소변 검사 동안 플라스틱 용기는 아이스박스에 차게 보관하거나 냉장고에 넣어 놓으십시오.
- 24시간이 지나면 플라스틱 용기를 검사실로 가져가십시오. 검사실로 이동하는 동안 용기를 아이스박스에 보관해 주시기 바랍니다.

8. Multimedia

- Specialties와 Media Type(Image, Video)으로 필터 설정 가능
- 이미지 PPT 파일로 변환: (1) 로그인 → 이미지 클릭 → 모니터 모양의 Add to Presentation 클릭 → 폴더명 설정 후 Add
 (2) 로그인 → 사용자이름 → Presentation → 해당폴더 → Export

The image illustrates the process of adding multimedia to a presentation through several steps:

- Browse Multimedia:** The user navigates to the 'Browse Multimedia' page. The 'Specialties' and 'Media Type' filters are highlighted with red boxes. The 'Media Type' filter shows 'Images' with 404,252 items and 'Videos' with 5,186 items.
- Image Detail View:** A detailed view of an 'Implanted Port' image is shown. The 'Add to Presentation' button is highlighted with a red box.
- Add to Presentation Dialog:** A dialog box titled 'Add to Presentation' is displayed. It shows a list of presentations, including 'New', '2018_test', and 'test1'. The 'Add' button is highlighted with a red box.
- User Profile Menu:** A user profile menu is shown with the 'Presentations' option highlighted with a red box. The 'Export' button is also highlighted with a red box.

Implanted Port This skill describes how to access, deaccess, and care for an implanted venous port.
